

Requirements

Overview

To run the Bug Report Classification codebase, ensure you have Python 3 installed on your system.

Required Libraries

The following Python libraries are strictly required for data processing, machine learning models, and statistical evaluation:

- scikit-learn: For training machine learning models (Naive Bayes & SVM).
- pandas: For robust data loading and manipulation.
- numpy: For efficient numerical operations.
- scipy: For statistical testing (Wilcoxon signed-rank test).

-To install all dependencies using pip:

```
pip install scikit-learn pandas numpy scipy
```
